(CELPR) National Law University, Delhi

[Click here for Registration.](#)

Certificates will only be provided to candidates who have registered and attended the whole programme. Last date for registration: **3rd June 2022**

Governance is considered as an important aspect for promoting environmental conservation and effective management of natural resources. With the advent of 21st century, significant steps have been taken in the form of legally binding international conventions and soft law dealing with crucial environmental issues at the global level. However, the key for dealing with modern day environmental challenges is effective environmental governance not just in the international arena but at the domestic level as well. India as a developing country with rich biodiversity and rapidly changing climate patterns is especially vulnerable to modern day environmental disasters and challenges such as air pollution, climate change, desertification etc. There is an urgent need to address these challenges through effective environmental governance at the domestic level and bridge the policy gaps.

Prof. (Dr.) Krishna Deva Rao  
Vice Chancellor, National  
Law University, Delhi

Dr. Kiran Bedi  
Fmr Lt. Governor,  
Puducherry

Prof. Dr. Amita Singh
