 Art and craft of international environmental law.--
 Cambridge: Harvard University Press, 2010. 359p.
 ISBN : 9780674035430.
 502(100)BOD
- It explains the fundamental questions about how international environmental law works. What role can law play in addressing global environmental challenges such as climate change, ozone depletion and loss of biodiversity. How do environmental problems come onto the international agenda? What are the obstacles to international cooperation and what can international environmental law do to address them? How do international rules develop? How are they put into practice and what makes them effective?
