Foreword

The current Intellectual Property landscape in India is presenting moderate challenges for new age libraries. Increasing signification of Intellectual Property laws generate a growing need to understand phenomenon and to discuss issues surrounding precarious aspects of IPR & Copyrights issues.

Information technology environment raises new challenges and opportunities in light of globalization and propounds new ways for the libraries in governing information via digital networks. Digital technologies have shifted various individual's demeanour that has been perfectly legal before the new information revolution into the formal infringement of IP laws. Technological developments like internet, digital databases, social networking, cloud computing and digital rights management have immense effect on the core of copyrights and other IPR Issues. A balance between intellectual property rights and knowledge management is essential for prolong growth and control of information explosion.

Tomorrow's society is a knowledge society. How can we contribute to shaping the knowledge society for tomorrow? New age libraries play an vital role in spreading awareness relating to publishing, dissemination and use of scholarly communications, transfer of copyright and maximizing impact factor of their work under the preview of IPR. A library maintains actual and statutory balance in copyright laws in preserving and sharing information under the provisions for libraries in the act. They often provide access to broad ranges of materials preserved as archival or copyleft material or available in public domain. Libraries are at the urge of debating in creation of new intellectual property laws to harmonize the balance between creators, publishers and users of new age libraries. With a good balance between copyright laws and intellectual property policy, the digital information environment grow opportunities for all the stockholders of information.

I hope this compilation of articles makes some new source of emerging and persuasive information on IPR and allied subjects and creates new and important issues in debate to pave the way and right approach towards Intellectual property rights and allied laws.

Prof. (Dr.) Ranbir Singh

TABLE OF CONTENTS

IPR Issues in Libraries

1. **Application of Intellectual Property Rights for Digital Preservation of Historical Collection at Indian Council of Historical Research: A Case Study.** 1
   Ramesh Yernagula
