DIPLOMA IN INSOLVENCY AND BANKRUPTCY: LAW, PRACTICE, REGULATIONS

About the Course

The enactment of the Insolvency and Bankruptcy Code, 2016 (IBC) has transformed India's insolvency regime by providing a time-bound framework for insolvency resolution, corporate restructuring, liquidation, and value maximization. With the increasing complexity of commercial transactions and the growing demand for skilled insolvency professionals, there is a pressing need for specialised legal and practical training in this field.

While the insolvency ecosystem continues to evolve, professionals, students, and practitioners often require a comprehensive understanding of the legal, regulatory, and procedural aspects governing insolvency and bankruptcy. This programme seeks to bridge that gap by equipping participants with both conceptual clarity and practical insights into the law and practice of insolvency resolution.

The course provides a comprehensive understanding of the Insolvency and Bankruptcy Code, 2016, along with the institutional framework, regulatory mechanisms, corporate insolvency resolution process, liquidation, personal guarantor insolvency, cross-border insolvency, and other emerging developments in insolvency law. It combines theoretical foundations with practical perspectives to prepare participants for professional practice and decision-making.

The programme is structured into specialised modules that introduce participants to the core principles of insolvency law before progressing to advanced topics, including corporate insolvency, liquidation, group and cross-border insolvency, real estate insolvencies, and insolvency of personal guarantors. The associated Certificate Courses enable participants to develop specialised expertise in specific areas of insolvency law and practice while offering the flexibility to pursue individual domains of interest or the complete Diploma programme.
